Suitable for use in all workplaces and industries including  
Mining,  
Construction,  
Utilities,  
Manufacturing,  
Transport, Storage,  
Forestry, Retail  
trade  
& Warehousing

**The METGUARD METATARSAL PROTECTOR** deflects and disperses the impact of falling loads. Durable, non-conductive, lightweight polycarbonate material. Secured with existing laces or elastic straps.

Designed and tested to compliment steel cap footwear. The lip of the METGUARD™ sits on top of the steel cap at load point and is secured with existing laces or optional straps. It helps protect the workers' upper foot by deflecting and dispersing the impact of falling loads. It is a perfect economical solution for visitors, temporary workers, clerical, sales people or when there's requirement for metatarsal protection.

- Unlike traditional metatarsal guards, the METGUARD is non-conductive for heat and electricity
- Used with existing footwear, transferable between users and shoes
- Attaches with your shoe laces or optional straps for non-lace up footwear
- The METGUARD is practical, comfortable, easy to fit and simple to use
- Meets minimum impact resistance 75 lbs as specified in ASTM F2413/F2412 (ANSI Z41)
- Part # IM-METGUARD/pr - Sold per pair
